OCTOPUS

Ozan Sinan Tiğloğlu

Nature is a treasure with endless resources for humanity. For centuries, humans have imitated the magnificence of nature in the field of science, art and design, seen it as a source of inspiration. As the name indicates, Octopus an original product that has been created by utilizing this source of inspiration. The design of its basic structure inspired by the octopus, it brings overlapping of its functionality with the general structure. With its formal structure that makes us feel the perfection of nature in our subconscious, it will become a distinctive and decorative product for our offices and living spaces at the same time.

Inspired by the intelligent and mysterious creature of the sea, the Octopus draws attention with its fluid form.

The metal frame with a balanced and solid structure, is completed by the arms carrying hangers with wooden or metal knobs. Just like each arm of an octopus can do different jobs simultaneously, Octopus hanger create a tidy working and living areas with its functionality, while acting as a decorative object at the same time.
