WORD

b-design team

“With its modern-classical line, Word is designed for strong spaces with its own style such as meeting, waiting, resting areas and executive rooms. It adapts to different usage scenarios with its simple, organic and elegant form. In addition to its high-level stance, it is a candidate to be indispensable for both new generation workspaces and modern-classical offices with its amorphous form.

Its body-supporting design, besides providing an ergonomic use, gives sense of confidence to the environment with its strong stance. While it adapts to current dynamic offices with its timeless line, it also refers to classical offices.”

Word, which has a sophisticated stance with its linear and robust design language, stands out in the area where it is used. High back and middle back alternatives shaped in accordance with human ergonomics, curved leather arms with a flowing form and wide seating area make the user feel privileged. The back structure, which can be locked at 3 different position and whose stiffness can be adjusted, encourages healthy movement. With its genuine and artificial leather upholstery options, Word adapts to every style and any office environment, from executive rooms to meeting areas.
