KOKTEYL

Nurçin Özcan Akın

Kokteyl Valet Stand and Hanger represent a product family consisting of two complementary products. The primary purpose of this family is to bring functionality and aesthetics together, enabling users to organize their daily lives in a more organized and stylish manner. Different angled bent metal pipe bending profile modules, offering a modern and minimalist appearance, come together to meet various needs. Kokteyl Valet Stand, whose main function is to maintain the form of a jacket, provides a special surface where small personal items such as keys, wallet, and phone can be organized.

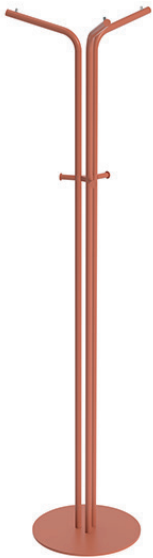

Kokteyl Hanger, on the other hand, is designed for communal spaces. Following the same design language and aesthetic understanding, this hanger is developed to complement the functionality of the valet stand. Both products speak a cohesive design language and help users organize their lives, offering a wide range of uses from homes to workplaces to meet the requirements of modern living.

Designed with the form of a human figure, Kokteyl Valet Stand is crafted for elegantly hanging your clothes. The hanger section at the top preserves the shape of garments without distortion, completing the user's stylish and professional look. Serving as an organizer with a special surface for placing personal items such as phones, watches, and keychains that you want to keep visible, it enhances the comfort of living spaces.

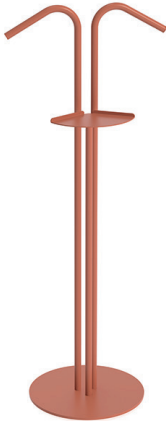

Kokteyl Hanger, another complementary member of the Kokteyl product family, creates orderly and practical spaces tailored to specific needs. With its sturdy and balanced stance thanks to its metal structure and a variety of color options, Kokteyl Hanger and Valet Stand bring order to all living spaces, from homes to offices, executive rooms to hotel rooms.
